

AMINO ACID 70

The pure composition of animal amino acids is processed by fermentation and enzymatic hydrolysis, which contains the highest level of protein and levorotatory amino acids and is fully absorbed by the plant and helps the plant in stressful conditions.

- * Increase chlorophyll content
- * Increase Plant's tolerance to stress
- * Boost the plant's immune system against diseases and pests
- * Improves absorption of essential elements through chelation effect

Elements	Total amino acid	Free amino acid	Organic Nitrogen	Soluble Sodium
Amount	%70	%66	%12	%4/5
Farm	1/5 - 0/5 kg in 1000 litr water in foliar application. 3-1kg/ha as fertigation			
Garden	2 - 7/5 kg in 1000 litr water in foliar application. 3-2 kg/ha as fertigation			

Warning:

- * Keep away from children.
- * Avoid touching the eyes with contaminated hands.
- * Read the instructions carefully before using this fertilizer.
- * In case of mixing with other fertilisers and pesticides, first test on a small scale.
- * This product contains Sodium(Na), So It is not recommended for plants sensitive to sodium.

Date of production, Expiration date and series of manufacture: Inserted on the product

Fertilizer registration number: 65606

Operating license number: 1935908
